DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 6-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 6, line 10, applicant should clarify the structure/arrangement of the two electrically separate circuits. Claims 7-10 inherit the defect of the parent claim.

Regarding claim 8, there is no antecedent basis for "said hollow bobbin."

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 2832

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
5. Claim 6 and 9, as best understood in view of the rejection under 112 second paragraph, are rejected under 35 U.S.C. 102(b) as being anticipated by Kuroki [JP 6-325952].

Kuroki discloses a planar transformer arrangement [figures 1-2] comprising:

- a multi-layer printed circuit board [see figure 1];
- primary and secondary windings [1, 2], wherein one of the windings being disposed in the printed circuit board and the other is disposed thereon;
- at least two electrically circuits; and
- a core structure [3, 4] extending through a pluralitu of through holes of the circuit board and windings.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 7-8 and 10, as best understood in view of the rejection under 112 second paragraph, are rejected under 35 U.S.C. 103(a) as being unpatentable over Kuroki [JP 6-325952] in view of Billings [US 4,692,604].

Art Unit: 2832

Kuroki discloses the instant claimed invention except for one of the windings being supported on a releasably replaceable hollow bobbin structure on the surface of the printed circuit board.

Billings disclose a releasably replaceable hollow bobbin structure [see figure 1] on the surface of the printed circuit board supporting a primary winding [24].

It would have been obvious to one having ordinary skilled in the art at the time the invention was made to use the bobbin structure of Billings for one of the windings of Kuroki for the purpose of providing isolation.

The specific use of the device would have been an obvious design consideration based on the intended applications.

Conclusion

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Tuyen T. Nguyen whose telephone number is (703) 308-0821.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Elvin Enad, can be reached at (703) 308-7619. The fax number for this Group are (703) 308-7722 and (703) 308-7724.

Any inquiry of a general nature or relating to status of this application of proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
